**eemagine GmbH – Berlin, Germany**

- Designs, develops, and manufactures EEG brain imaging technologies
- Sells globally under the brand **ANT Neuro**: [www.ant-neuro.com](http://www.ant-neuro.com)
- Technology development partner for neuroscience and digital health applications

**The Problem**

- Brain health assessment requires an EEG technician and must be performed in-clinic – **not scalable**
- Clinical data must be manually reviewed for a diagnosis – **not scalable**
- Data collection is currently **expensive, limited, and slow**
- Diagnostic, treatment, and health monitoring opportunities are **missed**

**The Solution**

- Portable cloud-enabled EEG-based systems can safely be used in the **home**
- Easy self-administered recording takes neurological assessment out of the **clinic**
- **Controlled** by the patient and **cloud-connected** via mobile phone/tablet
- **Health-cloud** storage, analysis, and representation of patient and study subject data
- Configurable **automated analysis** powered by **AI** unlocks new diagnostic, monitoring, and treatment options

**We are looking for research, clinical, and commercial partners to help us build the brain imaging infrastructure of the future!**
