Past

Test report generation

ENCAP driven

Automation limited to

Test itself

#### Future

- Test integration across the entire
  - safety testing chain
  - Transferability of KPI's
  - Swarm test methods & PG test bench
  - Multi vendor test environment
  - Campus network with RTC quality
  - Digital Twin
  - Automated PG endurance tests

### transport logistic

#### **Proving Ground Automation and Digitization**

- Real-time simulation with online
- transmission of the dynamic trajectories
- to the swarm participants on PG
- (CarMaker as part of the control center)
- Integration of virtual objects possible (mixed reality)
- Same scenarios in simulation and on PG
- Same scenario flow control / simulation

#### environment

# transport

- 80,000m<sup>2</sup> asphalt surfaces
  - (1.6 km x 0.2 km)
- Max. 4 lanes (4-lane intersection)
- Mobile building facades
- Autonomous Driving Level 3-5
- All city scenarios
- V2X
- Crossing assistant
- Turning assistant
- Stop and go traffic

Tanja Lehmann Team ADAS DEKRA Lausitzring

# Let's face the challenge together
